

## **UFP Factory Built Doubles Down On Superior RV Components, Named Exclusive Distributor of Supersede Marine Board**

Granger, IN – November 13, 2025 — UFP Factory Built, a division of UFP Industries and a trusted supplier of high-quality engineered components and structural solutions, announces its exclusive distribution partnership with Supersede, the cutting-edge materials innovation company developing sustainable, durable solutions for manufacturing and construction. Under this newly established agreement, UFP Factory Built will serve as the exclusive nationwide distributor of the Supersede Marine Board, a modern, scalable, and affordable composite board made from 100% recycled materials to RV OEMs.

"UFP has a long seven-decade history in prefabricated construction, which is defined by our deep knowledge of our industry and our ability to offer superior products to our customers," said DeWayne Creighton III, Vice President of RV Operations at UFP Factory Built. "The Supersede Marine Board complements UFP Factory Built's comprehensive line of structural components and advances our commitment to quality. We believe our RV customers' products are more than just a sale, they are the cornerstone of someone's dream to travel as far and wide as the road will take them, and therefore, it made perfect sense to partner with Supersede."

Supersede Marine Board is waterproof, rot-proof, and free of harmful chemicals. While its material eliminates steps such as sanding, sealing, and drying, reducing labor costs and increasing throughput, offcuts can be recycled through Supersede's buyback program, helping partners achieve zero waste goals.

"UFP Factory Built has earned the trust of RV manufacturers by delivering dependable, high-quality materials, and we're proud to partner with them to introduce a better way forward," said Sean Petterson, CEO and Co-Founder of Supersede. "Supersede Marine Board gives RV manufacturers a durable, sustainable, and cost-effective solution that simplifies production, strengthens performance, and enhances the customer experience. Together, we're helping the industry build RVs that last longer, perform better, and align with the growing demand for environmentally responsible design."

The Supersede Marine Board was recently showcased at the Elkhart RV Expo. This strategic partnership equips UFP Factory Built to deliver Supersede's high-performance panels to RV OEMs across the country, with distribution hubs in Indiana, Oregon, Idaho, and other locations.

### **About UFP Factory Built**

UFP Factory Built delivers structural components and custom solutions to the manufactured housing, modular building, RV, and cargo trailer industries. With 26 locations nationwide and backed by UFP Industries, we combine innovation, engineering, and a broad product portfolio, including framing, trusses, engineered wood, and branded offerings like Deckorators®, ProWood™, Edge™, Endurable™, and Brawn™ to help partners build better and faster. Our integrated distribution network ensures access to everything needed to complete the build, enhancing efficiency, bottom line, and customer experience. ## About Supersede

Supersede is a cutting-edge materials innovation company developing sustainable, durable solutions for manufacturing and construction. The company's flagship product, the Supersede Marine Board, is a modern, scalable, affordable wood replacement board made from recycled plastic waste. The Supersede Marine Board is 100% recyclable, waterproof, rot-proof, and free from harmful chemicals. Supersede's vertically integrated supply chain is reliable and streamlined, ensuring consistent pricing and increased throughput. Supersede is also environmentally sustainable, as its production process saves trees and utilizes recycled plastic waste. The Supersede Marine Board is poised to transform the manufacture of boats, modular homes, RVs, and trailers. Learn more about Supersede [here](#).
